Marks:
--/1.00

Use the internet to research one of the areas of research that contributes to our understanding of climate change. Give more detail on how the work is done. What does the data say? Are there things that we still do not understand? What are they? In the video you learned about

- Temperature readings from all over the world
- Satellite readings of temperature
- Satellite readings of the size of ice caps and ice sheets
- Tree Ring Data
- Ice Core Data
- Seafloor Core Data
- Computer Models

You may use those or you may use an area of study that you know about from somewhere else. Be detailed
